NORTHSTAR LEARNING ACADEMY

JEE & NEET Preparation Programme

Academic Prospectus 2026–27

A detailed mock brochure for building and testing a document-grounded RAG chatbot.

Institute	Northstar Learning Academy (fictional)
Campus	Hazratganj Study Centre, Lucknow, Uttar Pradesh
Programmes	JEE Main & Advanced; NEET-UG; Foundation Classes
Academic session	2026–27
Contact	admissions@northstar.example | +91-90000-12345 (mock details)

Important: *This is entirely fictional training data. Names, addresses, phone numbers, prices, schedules, policies, and outcomes are invented for software testing. Do not treat them as real institute information.*

Document purpose

This prospectus is intentionally information-dense and includes fees, batch schedules, eligibility rules, scholarship criteria, faculty profiles, policies, facilities, and frequently asked questions. It is designed to test PDF text extraction, chunk boundaries, semantic retrieval, metadata preservation, and grounded answer generation.

1. About the Academy

Northstar Learning Academy is a fictional coaching institute created for a software engineering demonstration. Its teaching model combines scheduled classroom instruction, guided practice, periodic assessment, doubt-clearing sessions, and progress reviews. The institute's stated objective in this mock document is to help students build conceptual understanding and develop consistent exam preparation habits. These claims are descriptive of the fictional organisation and are not evidence of actual student outcomes.

Teaching approach

Each topic is taught through a concept lesson, worked examples, guided questions, independent practice, and a short diagnostic assessment. Teachers are expected to identify recurring misconceptions rather than simply increase the number of questions attempted. Students receive weekly practice sheets and a monthly performance summary. The summary records attendance, test scores, topic-level accuracy, completion of assignments, and suggested revision priorities.

Academic support cycle

The standard support cycle has four steps. First, students attempt a diagnostic test. Second, faculty review errors and classify them as conceptual gaps, calculation mistakes, misreading, time-management issues, or incomplete revision. Third, students attend a targeted doubt session or complete a remedial worksheet. Fourth, a follow-up quiz checks whether the issue has been resolved. Students are encouraged to maintain an error notebook with the original question, the reason for the error, the correct method, and a date for reattempting it.

Programme categories

The JEE Main & Advanced programme is designed for students targeting engineering entrance examinations after Class 12. The NEET-UG programme focuses on Physics, Chemistry, and Biology for medical entrance preparation. Foundation Classes serve students in Classes 9 and 10 who want structured support in school mathematics, science, and early competitive-exam reasoning. Each programme has its own timetable, assessment plan, and fee structure.

Student responsibilities

Students are expected to attend scheduled classes, complete assigned practice, follow examination rules, and raise doubts respectfully. A student who misses a class should consult the weekly learning plan and request the relevant worksheet. Faculty may recommend additional practice, but students remain responsible for reviewing notes and preparing for assessments. Guardians are encouraged to discuss progress with the academic coordinator rather than relying only on isolated test scores.

Learning resources

Enrolled students receive printed or digital lesson notes, topic-wise practice sets, mock-test access, and a monthly progress report. Availability may differ by course and batch. The fictional institute does not guarantee a particular rank, admission, score, or selection. Outcomes depend on multiple factors, including prior preparation, attendance, practice quality, health, exam conditions, and the student's own effort.

2. Courses and Eligibility

JEE Main & Advanced — Two-year classroom programme

Duration: April 2026 to March 2028. Intended for students entering Class 11 or currently studying in Class 11, subject to a short diagnostic assessment. Subjects include Physics, Chemistry, and Mathematics. The standard timetable includes five teaching days per week, one guided practice block, and one weekly test or revision session. Students receive topic sheets, previous-year-question practice, and periodic full-length mock examinations.

JEE Main — One-year intensive programme

Duration: April 2026 to March 2027. Intended for students who have completed Class 12 or are appearing for their Class 12 examinations in 2026–27. The programme prioritises syllabus coverage, mixed-topic problem solving, timed practice, and systematic revision. Admission is subject to document verification and a counselling discussion about the student's preparation level. Students who need extensive foundational remediation may be advised to consider a different schedule.

NEET-UG — Two-year classroom programme

Duration: April 2026 to March 2028. Intended for students entering Class 11. Subjects include Physics, Chemistry, Botany, and Zoology. The programme includes NCERT-focused reading sessions, diagrams and terminology practice, numerical problem-solving, chapter tests, and cumulative mock examinations. Biology practice is organised around factual recall, interpretation of figures, and careful reading of question wording.

NEET-UG — One-year intensive programme

Duration: April 2026 to March 2027. Intended for eligible Class 12 students and recent Class 12 graduates. The programme uses a revision calendar with weekly targets, mixed-subject tests, and error analysis. Students are expected to maintain their own revision tracker. The institute may change the order of revision topics to address common learning gaps, while retaining the published syllabus objectives.

Foundation Classes — Classes 9 and 10

Duration: one academic year, renewable for the next class. Subjects include school mathematics, science, logical reasoning, and study skills. The course aims to strengthen core concepts rather than introduce an excessive volume of advanced entrance-exam material. Students receive fortnightly assessments and a parent or guardian progress meeting each term.

Admission documents

Applicants should submit a completed application form, a recent photograph, proof of date of birth, the latest school report or marksheet, and guardian contact details. Class 12 students may submit their most recent available marksheet if final results have not yet been issued. Original documents may be requested for verification but should not be retained by the institute. All eligibility decisions in this mock prospectus are illustrative and should be replaced with verified rules before real-world use.

3. Fees and Payment Schedule

All amounts in this section are fictional and are included to test questions involving exact amounts, instalments, discounts, and comparisons. Fees are shown in Indian rupees (INR). Unless stated otherwise, the listed tuition fee covers scheduled teaching and standard printed or digital course material. Transport, accommodation, meals, and optional external examination charges are not included.

Programme	Duration	Tuition fee	Registration	Total before discount
JEE Main & Advanced	2 years	■1,48,000	■2,000	■1,50,000
JEE Main Intensive	1 year	■82,000	■2,000	■84,000
NEET-UG Classroom	2 years	■1,42,000	■2,000	■1,44,000
NEET-UG Intensive	1 year	■79,000	■2,000	■81,000
Foundation Class 9	1 year	■36,000	■1,000	■37,000
Foundation Class 10	1 year	■39,000	■1,000	■40,000

Instalment options

For one-year programmes, students may pay the tuition fee in three instalments: 50% at enrolment, 30% by 1 August 2026, and 20% by 1 November 2026. The registration fee is payable at enrolment and is separate from tuition. For two-year programmes, the tuition fee is divided by academic year: 55% of tuition at enrolment and 45% by 1 October 2026 for Year 1; Year 2 fees are invoiced before the start of the second academic year. Any approved scholarship is applied to tuition only, not registration or optional services.

Payment methods and receipts

The mock institute accepts bank transfer, UPI, debit card, or payment at the accounts desk. Students should retain the official receipt and quote the receipt number when asking about a payment. Cash payments above the institute’s internal limit are not accepted. A payment is considered recorded only after it appears in the institute’s account system and a receipt is issued.

Additional charges

A replacement student ID card costs ■150. Optional printed duplicate notes cost ■500 per subject set. A late instalment reminder is issued after a seven-day grace period; the mock document does not specify a late fee, so staff must not invent one. Transport and accommodation are not provided under the tuition package.

4. Scholarships and Financial Assistance

Northstar's fictional scholarship programme is intended to demonstrate how a chatbot should retrieve eligibility conditions and calculate discounts without inventing exceptions. Scholarship awards are subject to document verification and the availability of the stated category. Only one merit scholarship may be applied to a student's tuition fee. Scholarships cannot be converted to cash or transferred to another student.

Merit scholarship bands

Score in academy entrance test	Tuition discount	Conditions
90–100%	30%	Valid test result; documents verified
80–89.99%	20%	Valid test result; documents verified
70–79.99%	10%	Valid test result; documents verified
Below 70%	No merit discount	Standard fee applies

Example calculation

A student enrolling in the one-year JEE Main Intensive programme has a tuition fee of ■82,000 and receives a 20% merit scholarship. The tuition discount is ■16,400, leaving ■65,600 payable as tuition. The ■2,000 registration fee is not discounted, so the total payable before any optional charges is ■67,600. The scholarship percentage applies to tuition only; it must not be calculated against the combined tuition and registration amount.

Need-based assistance

A limited need-based assistance fund may provide a tuition reduction of up to 15% after review of household income documents and a written application. The fund is not automatic and is not guaranteed. Applicants should submit the form before the fee deadline. The admissions committee may request additional documents, but sensitive documents should be handled only by authorised staff and should not be exposed in chatbot responses.

Sibling concession

A 5% sibling concession may be granted to the lower-fee programme when two siblings are enrolled concurrently. It cannot be combined with a need-based award, but it may be combined with a merit scholarship only when the academic director approves the combination in writing. The total tuition discount cannot exceed 35%. Registration fees remain payable in full.

Scholarship renewal

For a two-year course, renewal for Year 2 requires at least 85% attendance, completion of 80% of assigned practice sheets, and participation in scheduled assessments. Renewal is not based solely on a single test score. If a student falls below a requirement due to a documented exceptional circumstance, the guardian may request a review within ten working days of receiving the renewal decision. Approval is discretionary and must be recorded in writing.

Questions the chatbot should answer

Examples include: "What discount applies to a score of 86%?", "Does the scholarship cover the registration fee?", "Can I combine a merit scholarship with need-based assistance?", and "What conditions apply to renewal?" A correct answer should preserve thresholds, exclusions, and approval conditions.

5. Batch Timetables and Academic Calendar

Timetables may change during examination periods. The schedules below are fictional examples for the 2026–27 session. Students should check the latest notice from the academic office before relying on a room or timing.

JEE Main & Advanced — weekday batch

Day	Time	Session
Monday	07:30–09:00	Physics: concept and worked examples
Monday	09:15–10:45	Mathematics: guided problem solving
Tuesday	07:30–09:00	Chemistry: physical chemistry
Wednesday	09:15–10:45	Mathematics: practice and doubt review
Thursday	07:30–09:00	Physics: problem-solving workshop
Friday	09:15–10:45	Chemistry: inorganic/organic rotation
Saturday	08:00–10:00	Weekly test, alternating subjects

NEET-UG — weekday batch

Monday to Friday, 11:00–12:15: Physics; 12:30–13:45: Chemistry; 14:30–15:45: Biology rotation between Botany and Zoology. Saturday, 10:30–12:30: chapter test or cumulative mock. A short supervised break is scheduled between long sessions. Students should bring the current NCERT text, class notes, and a question notebook.

Foundation — evening batch

Monday, Wednesday, and Friday, 16:30–18:00: Mathematics and science alternately. Saturday, 16:00–17:00: reasoning practice or fortnightly assessment. The Foundation batch does not follow the JEE or NEET full-day schedule.

Important dates

Applications open: 15 February 2026. Scholarship entrance tests: 15 March, 12 April, and 10 May 2026. Orientation for new students: 28 March 2026. Regular classes begin: 6 April 2026. First diagnostic review: 2 May 2026. Mid-session break: 20–27 October 2026. Winter revision programme: 21–31 December 2026. Final internal assessment window: 1–15 March 2027. Dates are mock dates and should be treated as document-specific facts, not real public dates.

Attendance and missed classes

Students should notify the batch coordinator when they expect to be absent. Notes or worksheets may be shared through the student portal within two working days, subject to availability. Recorded lessons are not guaranteed for every classroom session. Students who miss a test should submit a written request within three working days; a make-up test may be approved for documented illness or another accepted reason.

6. Tests, Evaluation, and Progress Reports

Assessment is designed to provide feedback on learning, not only to produce a rank. Each course uses a combination of short quizzes, chapter tests, cumulative tests, and full-length mock examinations. The exact pattern depends on the programme and stage of syllabus coverage.

JEE assessment structure

The two-year JEE programme normally includes one weekly subject test, one monthly cumulative test, and a full-length mock approximately every six weeks after the first term. Tests may include single-correct, multiple-correct, numerical-answer, and mixed-format questions. Students should review both incorrect answers and questions answered correctly by guessing. The performance report records accuracy, attempted questions, time spent, and topic-level trends where the test platform supports those metrics.

NEET assessment structure

The NEET programme includes weekly chapter quizzes, monthly cumulative tests, and scheduled full-syllabus mocks as the course approaches the examination period. Biology tests may include statement-based and diagram-based questions. Students should verify factual errors against the prescribed textbook and note whether a mistake arose from recall, interpretation, or careless reading. Physics and Chemistry reviews should include the underlying concept and the calculation steps, not only the final answer.

How to interpret a score

A single score is an incomplete measure of preparation. A student who scores 70% on a difficult cumulative test may have a different learning profile from a student who scores 70% on a short chapter quiz. Comparisons should account for test difficulty, syllabus coverage, question selection, and the number of students participating. Progress over multiple comparable tests is usually more informative than a single rank. The institute does not promise that internal scores will translate directly into an external examination result.

Progress report fields

A monthly report may contain student ID, batch, attendance percentage, test name, marks obtained, maximum marks, subject-wise accuracy, assignments completed, strengths, priority topics, and the next review date. Reports are shared with the student and, where appropriate, the registered guardian. Staff should avoid sharing one student’s marks or personal information with another family.

Rechecking and test disputes

A student may request a calculation or answer-key review within five working days of a test result being published. The request must identify the test, question number, and suspected issue. The examination coordinator checks the published key and marking record. Rechecking does not guarantee a score change. Questions involving a possible printing error or ambiguous wording are referred to the subject lead, whose decision is recorded for consistency across the batch.

Academic integrity

Students must not copy answers, use unauthorised devices, impersonate another candidate, or share confidential test material before the scheduled assessment. If a breach is suspected, the examination coordinator documents the incident and gives the student an opportunity to explain. Any consequence must follow the written institute policy and be communicated to the guardian when required.

7. Faculty, Facilities, and Student Support

The faculty profiles below are fictional and exist only to provide realistic named entities and subject-specific facts for retrieval tests.

Faculty directory

Name	Role	Profile
Dr. Meera Sanyal	Physics lead	Coordinates JEE Physics lessons, mechanics workshops, and error-analysis sessions. Holds a fictional M.Sc. in Physics and 9 years of teaching experience.
Arvind Rao	Mathematics faculty	Teaches algebra, calculus, coordinate geometry, and timed problem-solving. Uses weekly mixed-question drills and solution comparison.
Nidhi Verma	Chemistry faculty	Teaches physical, organic, and inorganic chemistry. Coordinates reaction-revision sheets and numerical practice.
Dr. Kabir Hasan	Biology lead	Coordinates Botany and Zoology teaching, NCERT reading sessions, diagram practice, and cumulative revision.
Ritu Malhotra	Student counsellor	Helps students plan weekly workload, discuss study barriers, and communicate academic concerns. Does not provide clinical mental-health diagnosis or treatment.

Campus facilities

The fictional Hazratganj Study Centre includes 12 classrooms, two doubt-clearing rooms, a small library, a computer-based test room with 40 terminals, drinking-water stations, and a reception desk. Classroom capacity is capped at 45 students for the standard batch. The library holds reference books, past-paper compilations, and quiet-study seating. Students may borrow one book at a time for seven calendar days; renewal is permitted if no other student has reserved it.

Digital learning portal

The student portal provides the timetable, announcements, downloadable worksheets, test results, and fee receipts. Login credentials are issued after enrolment. Students should not share passwords or upload another student’s personal information. If access fails, they should contact portal support with their student ID and a brief description of the problem; passwords should never be sent by email or chat.

Doubt-clearing support

Scheduled doubt hours are Monday to Friday, 15:45–16:30 for JEE students and 15:45–16:15 for NEET students, subject to faculty availability. Students should bring a specific question and show their attempted solution. General requests such as “teach the whole chapter again” may be redirected to a revision session. Additional support is not a substitute for attending the original lesson.

Accessibility and conduct

Students who need reasonable classroom accommodations should contact the academic coordinator before the course begins. The institute will discuss feasible arrangements based on the request and available facilities. Harassment, bullying, discrimination, damage to property, and repeated disruption are prohibited. Concerns can be reported to the centre manager in person or through the official mock contact email.

8. Attendance, Refunds, Transfers, and General Policies

Attendance

Students are expected to maintain at least 85% attendance. Attendance is recorded for each scheduled class. A student who arrives more than 20 minutes late may be marked late rather than present for the full session. Medical or family emergencies should be reported to the batch coordinator as soon as practical. Attendance records can be reviewed by submitting a request to the academic office.

Withdrawal and refund policy

A written withdrawal request must be submitted by the student or guardian. If the request is received before the first regular class, 80% of tuition paid is refundable; the registration fee is non-refundable. If withdrawal occurs within the first 14 calendar days after classes begin, 50% of tuition paid is refundable. After day 14, tuition is non-refundable. Any approved refund is processed within 30 calendar days after the institute receives the required form and verifies payment records. Optional material charges already incurred are not refundable.

Batch transfer

A student may request one batch transfer per term, subject to seat availability and academic approval. Requests should be submitted at least five working days before the proposed transfer date. A transfer between programmes with different tuition fees may require payment of the difference; a refund of the difference is not automatic and must be assessed under the written fee policy. Transfers do not reset attendance records or scholarship-renewal conditions.

Course pause and medical absence

A temporary course pause is not guaranteed. A written request with supporting information may be reviewed when a student faces a significant medical or family circumstance. If a pause is approved, the institute will provide a written note stating the permitted duration, whether a batch seat is reserved, and how the student’s remaining classes will be scheduled. Staff must not promise an exception before the academic director has approved it.

Privacy and student records

Student records may include contact details, attendance, assessment results, fee status, and guardian information. Access is restricted to staff who need the information for academic or administrative work. Public notices and chatbot responses must not disclose individual student records, private phone numbers, payment details, or confidential scholarship documents. A student or guardian may request correction of an inaccurate record through the academic office after identity verification.

Complaints and escalation

Academic concerns should first be raised with the relevant subject teacher or batch coordinator. Fee and receipt issues should go to the accounts desk. Portal problems should go to portal support. If the issue remains unresolved after three working days, the student or guardian may submit a written complaint to the centre manager. Complaints should include dates and relevant reference numbers but should avoid unnecessary sensitive personal details.

Policy precedence

If a promotional message conflicts with the written fee, refund, or scholarship policy, the written policy and any later formally approved amendment take precedence. If two documents appear to conflict, the chatbot should identify the conflict and direct the user to the academic or accounts office rather than choosing an answer without evidence.

9. Frequently Asked Questions and Contact Directory

Admissions FAQs

Q: What is the total fee for the two-year JEE programme?
A: The listed tuition is ■1,48,000 and the registration fee is ■2,000, giving a total of ■1,50,000 before any eligible tuition discount or optional charges.

Q: Does the registration fee receive a scholarship discount?
A: No. Merit scholarships apply to tuition only. The registration fee remains payable in full.

Q: Can a student join the JEE intensive course after Class 12?
A: The one-year JEE Main Intensive programme is intended for students who have completed Class 12 or are appearing for their Class 12 examinations in 2026–27, subject to document verification and counselling.

Q: Does the institute guarantee admission to an IIT or medical college?
A: No. The prospectus makes no guarantee of rank, score, selection, or admission.

Q: When do regular classes begin?
A: The mock academic calendar lists 6 April 2026 as the start date for regular classes.

Fees and policies FAQs

Q: What happens if I withdraw after 14 calendar days?
A: Tuition is non-refundable after day 14. The written withdrawal request is still required to close the enrolment record.

Q: How long can a library book be borrowed?
A: One book may be borrowed for seven calendar days. Renewal is allowed if nobody else has reserved it.

Q: What attendance is expected?
A: Students are expected to maintain at least 85% attendance.

Q: How do I dispute a test score?
A: Submit a request identifying the test, question number, and suspected issue within five working days of the result being published.

Contact directory

Office	Contact	Purpose
Admissions desk	admissions@northstar.example	Applications, eligibility, required documents
Accounts desk	accounts@northstar.example	Fees, instalments, receipts, refund requests
Academic office	academics@northstar.example	Timetables, attendance, batch transfers, progress reports
Portal support	support@northstar.example	Login issues, worksheet access, test portal problems

RAG testing note

This fictional prospectus contains overlapping but not identical facts across sections, including fee amounts, dates, eligibility, discount rules, and policy exceptions. Use it to test exact retrieval, multi-condition questions, refusal to guess when information is missing, and source attribution. If a question asks for information not present in the document, the chatbot should say the prospectus does not specify it.
